LeetCode

EDUCATION

- **VIT Bhopal University** 2022-26
B.Tech.(Specialization in Cyber Security and Digital Forensics) CGPA: 8.63
- **Seth Anandram Jaipuria School, Vasundhara, Ghaziabad** 2020
Class X Score: 89.6%
- **Seth Anandram Jaipuria School, Vasundhara, Ghaziabad** 2022
Class XII Score: 88.2%

PROJECTS

•PPA (Predictive Posture Analyst)

A proactive cybersecurity tool that simulates attacker movement and maps out risk paths across your system using graph theory and real-time data.

- Designed and implemented a context-aware attack path simulator that models lateral movement from breach points using structured system configuration data.
- Built a graph-based risk propagation engine to evaluate interconnected relationships (users → processes → ports → services).
- Simulated real-world attacker strategies beyond just CVEs, focusing on contextual privilege escalation and privilege chaining.
- Tools used: Python, NetworkX, JSON, Custom Risk Scoring, Attack Graph Modeling

•Process Killer

Designed with automation, suspicious behavior detection, and optional email alerts to guard systems against rogue processes, malware behavior, and system resource usage.

- Developed a Bash-based process monitoring and termination tool to protect system resources and detect suspicious activities in real time.
- Integrated a Python log analyzer to examine process behavior and identify potential cyber threats using behavioral indicators.
- Designed the tool as a smarter alternative to Task Manager, automating the detection and safe termination of rogue processes.
- Enhanced system security by combining shell scripting and Python-based data analysis for proactive threat response.

CERTIFICATIONS

• Certified Ethical Hacker (CEH)

Demonstrated expertise in ethical hacking techniques, vulnerability assessment, and penetration testing to secure systems and networks.

• Ethical Hacking Certificate (NPTEL)

Earned with 78% (Silver Medal) from IIT Kharagpur; showcased proficiency in ethical hacking concepts, system security, and vulnerability identification.

TECHNICAL SKILLS AND INTERESTS

Languages: C/C++, Python, Java, Javascript, HTML+CSS

Libraries : C++ STL, Python Libraries, Bash Scripting

Web Dev Tools: VScode, Git, GitHub

Other Tools: TinkerCAD, Python IDLE

Frameworks: Django

Databases: Relational Database(MySQL), MongoDB(NoSQL)

Coursework: OS(Linux and Windows), Object Oriented Programming, Applied Cryptography, Computer Networking, Data Structures and Analysis of Algorithms

Area of Interest: Cybersecurity

Non-Technical: Violinist

EXPERIENCES

•Core Team Member of Content Team in BashCraft Club

Designed a social media content calendar that streamlined the posting process, resulting in a consistent online presence and a 50% increase in follower growth across platforms within a three-month timeframe.

•Core Team Member of Media Team in Freelancing Club

Produced and edited high-quality videos for promotional campaigns, event highlights, tutorials, and announcements, contributing to enhanced brand visibility and audience engagement.
